

Camden public wikis

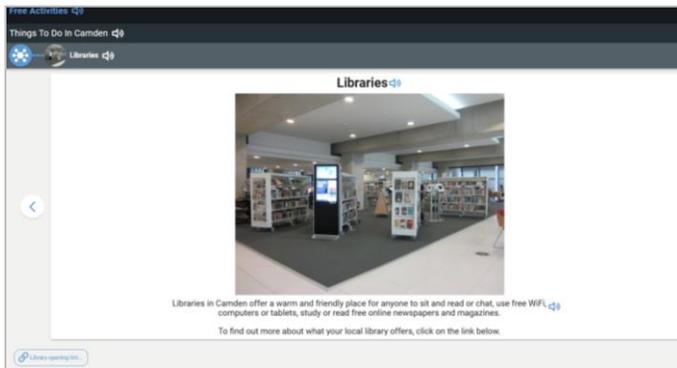

and where to find them

Presented by Jane Saunders

Wikis

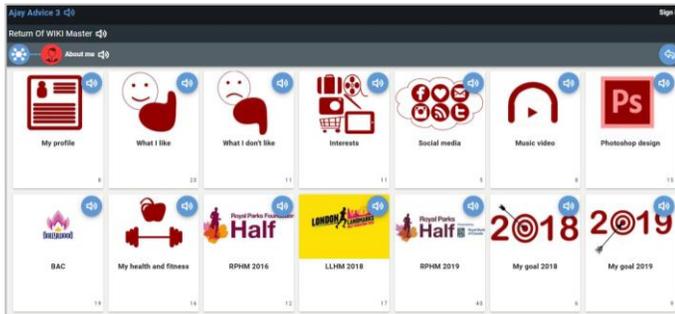

- a wiki is an easy to build and easy to use website – they can be **private** or **public**

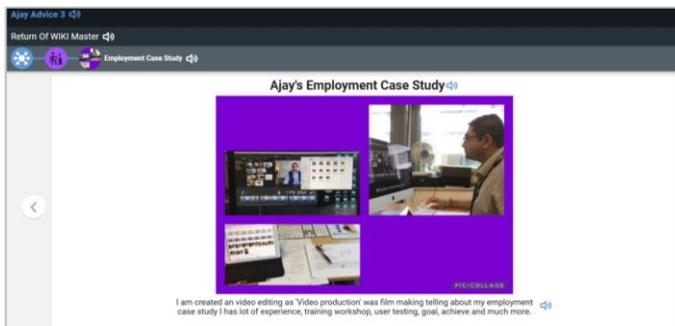

- you can add pictures, words, sound, links, maps and documents to your wiki

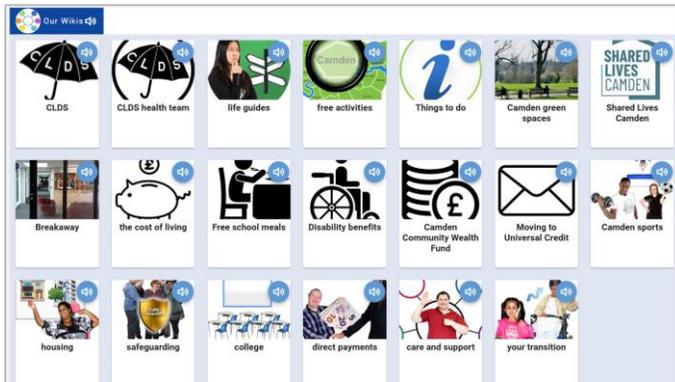

- a **private** wiki is a simple, accessible and secure digital **about me** – a bit like a private website

- it's a place where people with learning disabilities can tell their story and use pictures and videos to show people what good support looks like

- it uses pictures, sounds and words to capture the voice of the person

- wikis can also be used as **public** websites to deliver information in an easy and accessible way
- for example, these can be about community activities, local services, or health and wellbeing

Where to find Camden public wikis
